

TechNeal: Complete Lab Care

Expertise in Molecular Genetics

The modern Molecular Genetics Laboratory is a bastion of cutting edge technology and applications. To build such an institution requires not only knowledge in the field of genetics but also the ability to integrate the various processes involved molecular testing: to implement and put into action the most efficient genetics laboratory possible.

TechNeal offers a number of services in meeting the needs of the new or growing Molecular Genetics Laboratory, from pharmacogenomics to women's health and oncology, including:

Laboratory Setup	<ul style="list-style-type: none">• Facility design• Facility construction• Equipment sourcing• Reagent sourcing	
Operation Management	<ul style="list-style-type: none">• Technical consultation• Personnel sourcing• Personnel training• Workflow optimization
